
AFS/FEF Student Technology Scholarship Contest

Call for Submissions: 2011 AFS/FEF Student Technology Scholarship Contest

New Scholarships Available

Submissions are open for the 2011 Foundry Education Foundation (FEF) and American Foundry Society (AFS) Student Technology Scholarship Contest. The purpose of the competition is to encourage student participation and recognize excellence in student research in the field of metalcasting technology. The projects must represent current or recent work by the student in the area of metalcasting technology or molten metal processing. This is intended to highlight student and senior projects, graduate research and other work. Posters will be judged for technical merit and quality by a panel of metalcasting experts, based on the criteria below. The winning project(s) will receive an FEF scholarship and an AFS award of merit. Additional scholarships will also be offered in the 2011 contest. The winning project(s) will be posted at the 115th Metalcasting Congress, April 5-8, 2011, in Schaumburg, IL. All participating students will receive complimentary registration to the Metalcasting Congress and a certificate of completion and top projects will be selected for publication in the IJMC. AFS/FEF Student Technology Scholarship Contest is open to North American citizens currently enrolled in metalcasting related programs at FEF accredited and affiliated schools. Students must be

registered with FEF and enrolled in the current and upcoming academic year.

Submission:

All submissions must be in electronic format (Microsoft PowerPoint), with a maximum of 6 PowerPoint slides per each submission (plus bibliography). Completed application form and final presentations must be submitted to AFS Technical Services by Feb 1, 2011.

Contact: Katie Doherty, AFS Technical and Information Resource Assistant, 1695 N Penny Lane, Schaumburg IL 60173. 800-537-4237 x 294 or katie@afsinc.org for contest application, criteria and presentation template.
